PLANS LEASED WITH FULL SIZE PATTERNS.

TRI-STAR 18 has proven to be a small trimaran with outstanding performance. She has strength and sea worthiness with the forgiving qualities that make her sailable by anyone. One may enjoy both ocean day racing or summer lake cruising with ease for her light weight and hingeable beams make for easy trailering. TRI-STAR 18 has 7 ft. long trampolines that will accommodate a sleeping bag easily and with the addition of a boom tent you have a mini yacht that has ample dry hatch stowage for weekend cruising gear. To make it easy owning a small TRI with a big boat feel and enjoyable for all to build we have comprehensive plans with full size hull patterns and optional main hull construction of either sheet or double diagonal plywood, or foam F.G. construction
